

LK Armatur

A One-Stop Supplier

For the simpler, smarter everyday

Simpler. Smarter. More sustainable. At LK, we believe there's a better way to do everything. That's why – from water, heating and hydronic solutions to pipe extrusion – we push for innovation over status quo and simplicity over complexity. It's a belief all of us at LK apply to every product and solution we create.

Our history

Founded in 1910, LK is a family business, working internationally in the heating, water and sanitation industry. A market leader in Sweden, the group currently employs approximately 400 people and actively increasing sales of products, systems and solutions in the Nordic region, Europe and the United States. LK works with continuous improvement and strives for a sustainable, long-term and respectful relationships with its employees, suppliers and customers.

Our companies

LK Armatur is a leader in Europe, producing millions of valves per year for the global HVAC market. Beyond individual products, we understand how all parts interact in your complete application. From standard to sophisticated customizations of valves, controllers, components and prefabricated units, our full-spectrum expertise makes it easy to get the results you need today, while anticipating your needs tomorrow.

LK Pex is a leading OEM manufacturer of high-quality plastic pipes for the HVAC industry, particularly housing applications. Our proprietary production technology for cross-linking PE-Xa tubes gives pipes unique flexibility and compressive strength. With this and every advancement we make, we aim to simplify your everyday challenges for smarter results today and tomorrow.

LK Systems is the leading manufacturer of easy-to-install systems for heating and tap water distribution in the Nordics. Through our prefabrication unit, we also provide tailor-made solutions that simplify the installation process even further.

LK Armatur

A One-Stop Supplier

LK Armatur was founded in 1985 when the LK Group increased its focus on supplying manufacturers of heaters and hot water heaters with valves and components.

We are a complete supplier of customised products and solutions and we produce millions of valves annually. We have advanced pipe manipulation & bending facilities for both stainless steel and copper pipes and our accessories come from leading suppliers in Europe. Our extensive product range consists of 4 product areas:

- Valves
- Electronic Heat Regulation
- Prefabrication
- Accessories

Helsingborg, Sweden; Our Main Office. We develop and manufacture most of our products here.
Bad Oeynhausen, Germany; Main Office for Germany sales company, LK Armatur Deutschland GmbH.
Zrenjanin, Serbia; Production unit focussing on pipe prefabrication.

Valves

- Valves for water heating
- Filling valves
- Mixing valves
- Loading units
- Pump groups
- Safety valves
- Zone valves
- Thermic valves

LK Armatur's core business is built on the in-house development and manufacture of valves system solutions. Our standards are high to meet our partners and customers' high expectations.

Thanks to our experience, knowledge and curiosity in the field, combined with the latest technology, we can provide the market with a complete range of both standard products and advanced and customised solutions.

A selection of our products is shown above. Visit our website to see our complete product range.

Electronic Heat Regulation

- Temperature controllers
- Differential temperature controllers
- Solar controllers

LK Armatur's own range of electronic heat regulation and differential temperature controller products can be found under the product family name, Smart. Simple, user-friendly products that meet the needs of our customers in a smart manner.

- SmartComfort - temperature controllers
- SmartBio and SmartStove - differential temperature controllers
- SmartSol - solar controllers

Prefabrication

- Soldering
- Welding
- Bending
- Cutting
- Flanging
- Collaring
- End forming for O-ring seals
- Assemblies

When it comes to prefabrication, we work both with the machining of pipes and assembly of components for complete units. Prefabrication can include everything from bending pipes to designing and manufacturing advanced customised heating, water and sanitation solutions. We manufacture pipes using stainless steel and copper. Our extensive experience assures you are secure when starting up projects with us.

We are your OEM partner, from concept to finished products and solutions.

	Stainless steel	Hard & soft copper
Material	304L & 316L	EN 12735-1*
Thickness	1-1.5 mm	0.6-2.0 mm
Dimension	Ø 6-42 mm	Ø 6-42 mm

* Higher purity standard for copper pipes.

Accessories

- Manometers
- Thermometers
- Expansion vessels
- Fittings
- Flexible hoses
- Circulation pumps

Our close cooperation with leading European manufacturers means that we can offer you a wide range of quality products. We convey established brands that are approved according to national and international standards. The accessories are mainly used as components in our customised total solutions.

A photograph of a family of three playing on a light-colored carpeted floor. A man in a dark blue patterned shirt is on the left, a woman in a blue and white striped shirt is in the center, and a young child with blonde hair in a tan sweater is on the right. They are surrounded by various wooden toys, including blocks, a dinosaur, and a lizard. The background shows a light blue sofa with cushions. The text "Correct temperature – of course" is overlaid in white in the center of the image.

Correct temperature – of course
